Highlights

Of those who do not utilize tools during the period of study, 9 out of 10 utilize some tool(s) in their mandatory review course. Only one offers nothing in the use of tools during their review course.

Those with 2 or more tools in their curriculum have a tendency to continue with two or more tools in their review course. Some institutions in this category swap out a tool for a new one when they enter into the review course.

Highlights

One respondent used four tools during the period of study but only one tool during the review course. This indicates that future surveys may need to use very specific language.

Overwhelmingly the three most popular tools are the DEAD Simulator, NBE Exam Prep (Petteway), and Kahoots in this order for review course usage. This order is also the same for curriculum usage.
