ABFSE ADMINISTRATION REPORTS

Program Year: 2023

Report Name: Yes/No Questions - Summary

Report Date: June 03, 2024

Yes/No Questions - Summary (Total Complete Reports: 58)

Section/Question	Yes	No
Section 1 - Accreditation Information		
Is the institution regionally accredited?	49	9
Does the institution offer any funeral service/mortuary science-related programs/diplomas that are not ABFSE Accredited?	18	40
Section 2 - Faculty and Staff Changes		
Have there been any new program faculty or administrative staff added since the last annual report?	34	24
Does the program employ any full-time faculty who have not earned a masters degree?	18	40
Section 2 - Other Program Changes		
Have any significant budget changes (i.e. increases/decreases greater than 10%) occurred since the last annual report?	2	56
Have there been significant changes in Student Enrollment since the the last annual report? (i.e. Is increase/decrease of Total Current Enrollment over Total Prior Enrollment, as entered above, greater than 10%?)	29	29
Have any changes been made in published philosophy and/or objectives of the program?	3	55
Have any significant curricular changes been made during the past year?	10	48
Have there been any major changes in the learning resources of the program during the past year?	4	54
Have there been any major changes in the student personnel services provided by your institution during the past year?	5	53
Have there been any major changes in the program's physical plant or equipment during the past year?	7	51
Have there been any major changes in the organization, administration, control or departmental procedures during the past year?	24	34
Section 3 - Standards and Compliance		
Have any adverse actions been taken against the program or sponsoring institution by another accrediting agency during the past year?	1	57
Has the program received any written student complaints since the last annual report was submitted?	9	49
Section 5 - Distance Education		
Does your institution/program offer distance education courses?	45	13
Is a complete Degree offered via Distance Education? (Complete = 21 >50% = 5 <50% = 7)		
Is Distance Education available only for General Education courses?	12	33
If Distance Ed is not offered or if for General Ed Only, are there plans to offer Distance Ed courses in the future?	8	17
Procedures acceptable to USDE are in place to confirm the identities of distance education students?	33	0

Report Name: Student Outcomes - Statistics

Report Date: June 03, 2024

Student Outcomes
(Total Complete Reports: 58)

Institution	Graduation Rate Calculation Method	Num Grads	Grad Rate(%)	Placement Measurement Method	Num Placemnt	Placemnt Rate(%)
American Academy McAllister Institute of Funeral Service	Currently, a student is said to have graduated in a timely manner if they complete the program within three years.	42	52.5	We are consistently attempting to gather data via surveys at the time of graduation, follow-up surveys, emails and phone calls. This allows us to gather data necessary for the annual report but to also focus on job placement for those graduates in need. If a graduate is employed, funeral service related or not, they are counted as being employed. We received responses from 73 of 80 graduates. 71 are employed.	80	89
American River College	The number of graduates/the number of the enrolled cohort. Reported to ARC Workforce Development.	14	100	The number of employed/the number in the cohort. Reported to ARC Workforce Development.	14	100
Arapahoe Community College	We calculate using the number who were scheduled to graduate in a given year against how many did in that year. In 2023, 44 were scheduled to graduate and 43 did.	43	97.2	We conduct an exit survey of all graduates, which they must fill out to graduate, indicating their employment at the time of graduation, and ask that they self-report again in January of the following year. This is done via an email survey returned to the program chair.	43	100
Arkansas State University Mountain Home	Graduates who complete the second half of the AAS-FUS degree (starting when they have 34 or more credit hours completed), who then complete all degree requirements within 150% of their normal time to completion (3 full 15-week semesters) are considered to have graduated on time. These data are reported to the Arkansas Department of Higher Education and IPEDS.	9	90	ASUMH surveys all graduates within 6 months after graduation and determines who has secured employment in their field. Additionally, those that have continued on to additional education and/or military service are included among the employed category. Those that are employed, but not in the field of study, or those that continue to seek employment are categorized as not employed in field. Graduates are evaluated 6 months following graduation, allowing them time to search and secure employment. These data are reported to the Arkansas Department of Higher Education, IPEDS, and Perkins Grant administration.	10	100
Brightpoint Community College	Students must complete the prerequisite requirements and then make formal application for acceptance into the program. Graduation rates are based on graduates who have completed the core curriculum requirements in six of fewer semesters.	33	95	At the end of the semester, graduating students are surveyed to determine employment status. Included in that survey is current employment in Funeral Services or other. Students are also asked to provide contact information for their employers. Graduates are also contacted by the program head after they Graduate to determine job status.	33	91
Cape Cod Community College	Graduation rate reflects cohort graduation rate (% of students from original cohort completing in the designated year)	13	93	Employment in a Funeral Service related field within 6 months of graduation.	13	100
Carl Sandburg College	Our graduation rates for our program is based on who sits for arts and sciences side of the exam. Once a student has taken both then we graduate them.	11	75	With such a small group of graduates, we are able to keep in touch with them on a regular basis following graduation. That is how are numbers are generated as well as our student surveys.	11	100
Chandler-Gilbert Community College	The number of students that graduated divided by the total number of students	26	90	The total number of graduated who indicate they have been employed in the field divided by the number of graduates	26	77
Cincinnati College of Mortuary Science	The percentage of students completing the program of those who began in the same cohort. We exclude students who withdraw the first week of class. Reported to IPEDS and HLC.	45	98	The percentage of graduates eligible for and seeking an apprenticeship who actually obtain one. Excludes those not willing to relocate, along with those pursuing additional education, another career or military service. Reported to HLC as employed if within 6 months of graduation.	46	97
Columbus Technical College	The graduation rate for the Funeral Service Education program is determined by calculating the number of graduates for the said year and divided by the total of students within the initial cohort. This data is submitted to the Knowledge Management System (KMS).	3	23	The job placement rate is calculated by the number of graduates employed in the Funeral Service industry. That number is divided by the total number of graduates from the Funeral Service program. This data is submitted to the Knowledge Management System (KMS).	5	100
Commonwealth Institute of Funeral Service	The rate is obtained by dividing the number of graduates (in the two yearly graduating cohorts) by the number of new students in the cohort(s) that completed 1/2 of the program length.	141	82	The Texas Workforce Commission requires a completer survey to be filled out by each graduate at the time of graduation. This form is used to determine/verify a graduate's employment status. The total number fo those employed in funeral service is divided by the total number of graduates.	142	70
Community College of Baltimore County - Catonsville	For an Associates Degree, the ABFSE Standard states that students have 18 additional months to complete the program once they have completed 50% of their course work. The Mortuary Science Program uses successful completion of MORS 101 (Funeral Service Principles I) as the benchmark to determine whether students have completed 50% of their degree (including general education courses per the ABFSE Standard). The Mortuary Science Program reports the students who have successfully completed MORS 101 Funeral Service Principles I for cohort tracking purposes and to report the cohort to the ABFSE in their annual report. The cohorts reported in the	9	64	Per Standard 11, employment rates are calculated using student data taken 6 months after graduation. 14 students graduated in 2023, and 14 of these are actively working in funeral service. The employment rate is calculated as 100%	14	100

previous ABFSE annual reports are used to calculate graduation rates for the 2023 annual report. CCBC reported 14 graduates in 2023. Using the ABFSE previous annual report data, nine of the 14 graduates were reported 50% completed in previous annual reports. Five of the graduates took more than 18 months to graduate after completing 50% of their degree. CCBCs graduation rate is $(9/14 \times 100) = 64\%$

Cypress College	Number of graduates divided by the number of newly enrolled Mortuary Science students (same time period)	25	54	Number of graduates employed within 6 months of graduation divided by the total number of graduates	31	84
Dallas Institute of Funeral Service	The graduation rate is calculated by dividing the number of students who have completed their academic program and earned their degrees by the total number of students initially enrolled in the program. Specifically, the calculation considers the Capstone class as the determining cohort.	131	88.7	The number of graduates employed in Funeral Service or Funeral Service related occupations plus those that may be continuing their education divided by the number of graduates.	134	83
Delgado Community College	The number of graduates divided by the number of students in the program at 50% of the program requirements. Allied Health	20	81	Students employed 6 months after graduation. Allied Health	22	86
Des Moines Area Community College	I add the number of returning students on January 1, 2023 to the number of new students in 2023 who did not drop during the drop period to get the total enrollment number. I add the number of graduates to the number of students retained in the program on January 1, 2024 to get the number of returning students. I divide the number of returning students by the total enrollment to get the Graduation/Retention Rate. Returning Students Jan 1, 2023 = 135 New Enrollees in 2023 = 118 Total Enrollment = 135+118 = 253 Number of 2023 Graduates = 66 Number returning Jan 1, 2024 = 169 Total Grads and Retention = 235 Total Grads + Retention / Total Enrolled = 235/253 = 92.9%	61	92.9	We ask students to complete a Graduate Data Survey during the final semester visit to campus and ask them to respond whether they have a job or not. If a student replies that they do not, we will double-check prior to (and as part of the annual report) to see if they have an internship started. We will add those who have internships at the time of graduation to those who we identified had added an internship after graduation and divide this number by the total graduates. Graduates employed in FS (65) / total Graduates (66) =	66	985
East Mississippi Community College	Graduation rates are calculated according to Standard 10.3.2. Students who enroll in the fall term of their sophomore year (i.e. 50% of the program) are tracked to graduation for calculation of the timely graduation rate. Graduation rates for the FST program are submitted to federal Perkins reports, Mississippi Community College Board, National Student Clearing House and integrated postsecondary education data system (IPEDS).	13	87	Employment rates are calculated according to Standard 10.3.3 and Standard 10.1.2.e. Job placement was calculated within one month of each student's graduation. The EMCC Funeral Service Technology graduate survey was distributed in May of 2023 with three responses. Susan Baird, Director of Education and Institutional Effectiveness, compiles and distributes surveys for graduates and employers. Potential graduates inform the Program Director of their employment status. Verification is made by the Program Director via email and phone calls.	13	100
Eastwick College	We report graduation rates to the Accrediting Commission of Career Schools and Colleges (ACCSC). ACCSC requires that we report day and evening cohorts separately within specific start date time frames, which depend on program length. The cohorts for the 2023 Annual Report were 12.01.2018 - 11.30.2019 (evening). There were no students to report for the day session. The graduation rate was 63%, which met ACCSC's benchmark for programs greater than or equal to 24 months. Graduation Rate = $A / (B - C + D - E)$, where: A = Graduates within 150% of program length B = Number of students who started the program C = Transfers to other programs D = Transfer from other programs E = Students who were unavailable for graduation (death, incarceration, active military service deployment, or onset of medical condition)	15	63	ACCSC uses the following formula: Placement Rate = $A / (B - C - D)$, where: A = Graduates employed in the field B = Graduates within 150% of program length C = Graduates who pursued further education D = Graduates who were unavailable for employment death, incarceration, active military service deployment, onset of medical condition, or visa ineligibility)	16	92
Fayetteville Technical Community College	Graduation rates are calculated on a student's entry date into the Funeral Service Education (A55260) program that complete all graduation requirements within 150% of their normal time to completion, which is equivalent to six semesters. This data is submitted to the Department of Education, National Center for Education Statistics and the North Carolina Community College System Office.	40	72.7	Employment rates include graduates who are employed in Funeral Service or related field, continuing their education and active duty military. In this Annual Report, of 55 graduates, 42 were employed in Funeral Services and 6 indicated that they were continuing their education. As a result 48 of 55 students were determined to be employed in our Job Placement percentage of 87%. Graduation rates are posted on our college website and submitted to employers participating in the employer survey.	55	87
FINE Mortuary College	For the purpose of calculating graduation rates, students moving through the second half of the associate program will be considered to have graduated on time if they complete their degree in 18 months (6 semesters). For the purpose of this report, students are marked as halfway through the program once they have reached 35 credits and are considered "timely graduates" if they complete the remainder within 18 months.	25	89.3	Students are provided a graduate data survey upon completion of degree requirements. FMC considers graduates employed if they fall into one of the following categories: employed in funeral service or funeral service related field, active military, or enrolled in further higher education. (Third party verified).	28	96
Florida State College at Jacksonville	We calculate the number of students who are enrolled in the last fall semester of the funeral services divided by the number of students who have completed all graduation by the end of December 2023.	10	79	Student surveys and interviews are held throughout the last two semesters of the program to confirm that all students have a full or part-time position with a funeral home.	11	100
Goodwin College	Graduation rate is the percentage of students who complete the Funeral Services program within 6 semesters after they were enrolled in the program. Calculation: the number of graduates divided by the number of enrolled students.	10	100	Programmatically: Students and employers are surveyed after graduation; Institutionally: Students are surveyed 6 months after graduation.	10	100
Gupton-Jones College of Funeral Service	The graduation rate is measured by dividing the number of graduates by the total number of students in the program (Capstone Course). Graduation Rate= (number of graduates/total number of students in the program (Capstone Course) * 100	116	72	The job placement/employment rate is measured by dividing the number of graduates employed in the funeral service industry, divided by the total number of graduates. Job placement/Employment Rate= (number graduates employed in the funeral service industry/total number of graduates) *100	122	67
Hudson Valley Community College	Calculations used previously The total number of graduates divided by the number of entering students is the graduation rate. Students eligible for graduation from a specific cohort & timely graduation. the graduation rate is the number of graduates divided by the total number of graduates, dropouts, and continuing students . Use the Catalog date of when students were matriculated.	10	70	Total number of graduates which fulfill requirements, those who complete NBE vs. those not taken or incomplete (fail) total # grads registered with state residency/licensing board within 6 months of graduation. Out of State students do not register with NY and do not report p/f to school. Some states do not need NBE - VT & MA - students are employed without the exam.	12	74

Ivy Tech Community College of Indiana - Central Indiana	Students who complete their degree in 1.5 times the length of the program (90 credits, 5 semesters)	100	99.8	Survey of students within 6 months of graduation divided by the total number of graduates.	22	9956
Jefferson State Community College	The report will cover Fall 2022 to spring 2023, no summer enrollment. The students moving through the second half of the AAS Degree Program who would be considered to have graduated on time if they completed their degree within 18 months vs. the number of students that completed the FSE Program over 18 months. 50% of the FSE Program is 33.5, 67 hours total. The graduation rate is calculated by using Standard 10.3.2 (When students complete 50% or more of the degree program they will be tracked to graduation for calculation of the timely graduation rate. From this point, completion in 150% of program length will be considered timely graduation).	17	81	Annually, the Institutional Effectiveness department conducts a job placement survey, however, our students are employed at a funeral home during their enrollment in the FSE Program and prior to graduation. The FSE Program counts program completion and six additional months toward job placement. Also note, if a student loses employment while in the FSE Program we sometimes will assist with new employment. Students has 3 weeks to find new employment to continue in FSE Program.	30	100
John A Gupton College	From the point a student completes 50 percent of their program "31 semester hours for Associate of Arts Degree/30 semester hours the Associate of Applied Science Degree", the student must complete the entire program within 1 1/2 times the remaining length of the program. (3 semesters).	41	66	The placement/employment rate for John A. Gupton College is calculated by the percentage of graduates working in funeral service or related field versus those who are not working in funeral service or related field.	62	90
Kansas City Kansas Community College	Program coordinator tracks the data on students who begin and complete the program, students have three consecutive semesters to complete the program and be counted as a graduate. We divide the number who did finish by the number who should have finished.	27	96	Data is collected from the information from the graduates, reports from employers, and information from follow-up survey conducted for all KCKCC graduates by Institutional Effectiveness. We divide the total grads with the total students who are employed in funeral service.	27	93
Lake Washington Institute of Technology	The number of graduates is divided by the number of students who completed 50% or more. This is reported to the ABFSE and the SBCTC	21	86	The number of graduates that are employed in funeral service or related fields is divided by the total number of graduates. This is reported to the SBCTC.	22	86
Malcolm X College	Students moving through he second half of the program will be considered to graduate on time if they complete their degree within 100% times the program length (4 semester terms).	15	70	Job placement and Employment is calculated by the number of graduates that secure employment within 6 moths of graduation in any professional field. Data is collected via survey, and the results are submitted to Malcolm X college Intiutional Effectiveness Department for review.	15	100
Mercer County Community College	Gradate rates is measured by completion of program within the calendar year.	14	95	Each student is required to have obtain an internship prior to enrolling in the program. Only 1 percent of students may have not secured an internship prior.	18	100
Miami Dade College	We process two graduations per year, and this data is submitted to our Campus Solutions' team. The graduation rate is calculated as number of students graduated per number of students that are still active in the program. Our current graduation rates are low because mostly of our students are part-timers.	1	24	We process annual surveys to receive these data, and this is calculated as number of graduates that are currently fully employed per number of total graduates.	41	14
Mid-America College of Funeral Service	Graduation rate = Number of students graduating / Total number of students in the program (capstone class) x 100	80	75	Measurements are based upon our student graduate information survey. Job placement rate = Number of students employed if FS/ Total number of graduates in the program (capstone class) x 100	80	84
Milwaukee Area Technical College	The graduation rate is calculated by dividing the number of graduates from the Funeral Service Program by the number of students enrolled at the start of the given cohort. This data is reported to the ABFSE.	25	87	Job placement is calculated by dividing the number of currently employed Funeral Service graduates by the number of total Funeral Service graduates in a given cohort. This data is reported to the ABFSE.	27	100
Mt. Hood Community College	We divide the number of graduates by the number of students who reached week three of the first term of the second year of the program.	26	93	We divide the number of students who found employment in the first six months after graduation by the number of graduates. For 2023, we had 22/28 graduates find employment within the first six months of graduation.	28	79
Nassau Community College	Students that graduate in a timely manner. This is defined- 1 and 1/2 academic years of the program length	32	100	A graduate is considered working if they are employed in a funeral service position in a funeral home. This information is sent to our NCC Web Editor to be published on the NCC Mortuary Science website and the ABFSE website. In our most recent graduating class 93.7% (30/32) are working in a funeral service position.	32	94
North Shore Community College	Students are tracked to graduation and included in the following graduation rate calculations only when they reach the point in the program. The annual graduation rate is calculated by dividing the number of graduates in an academic year by the total number of those admitted from the graduates cohort year(s), minus the number of students still actively enrolled in the program from the respective cohort(s), minus the number of previous graduates from the cohort(s), if any. Students are considered not actively enrolled in the program when they have informed the program of their intent to withdraw, in writing, or they have not been enrolled in any courses for more than one semester (not inclusive of Summer or Winter Term), at which point they are automatically removed from the program.	100	75	Graduate employment status is gathered through the mandatory completion of a graduate survey. Graduates who indicate they are directly employed in funeral service, employed in a funeral service-related field, are active military or are continuing on to further higher education are marked as employed. The total number of employed graduates is divided by the total number of graduates for that year to determine the respective employment rate.	3	67
Northampton Community College	The calculation is based on the enrollment of students in the original cohort vs. cohort graduates. The information is communicated with the Dean of the School of Health Sciences and Education and the Vice President of Academic Affairs.	15	94	The calculation is based on the number of graduates vs. those employed in funeral service or related fields.	15	93
Northeast Texas Community College	Graduates of the A.A.S. in Funeral Service Education will be calculated by the successful completion of MRTS 1225- Thantochemistry. This course was selected because it is a science course offered early in the student's educational experience (second semester), and enrollment in this course would indicate an Interest in the A.A.S. degree. Graduates are tracked from MRTS 1225 course completion through to graduation. We do allow students the opportunity to transfer to a different cohort should they fail a course or need to change their schedule. If a student leaves or doesn't enroll for future program courses and has completed MRTS 1225, they will be counted as a student who was dropped or has withdrawn from the program.	19	83	Employment rates are calculated using graduate surveys and personal communications. Calculating Job Placement:(Students that indicate employment in funeral service through surveys and/or personal communications) = B (B /number of Graduates)* 100 =% of graduates employed in funeral service. Job placement rates are reported to theABFSE and institutionally during our three-year program review.	19	79

Calculation of Graduation Rate: (Number of students successfully completing MRTS 1225) = X (Number of students entering from a different cohort) = Y (Number of students transferring to another cohort) = ZX + Y - Z = Tracking cohort (Number of students who withdrew or were dropped from the program) = A (X + Y - Z) - A = Graduates (Graduates/Tracking cohort) * 100 = Graduation Rate. Graduation rates are reported to the ABFSE and institutionally during our three-year program review.

Northwest Mississippi Community College	NWCC utilizes the number of students who meet the 50% benchmark of the curriculum versus those who actually graduate (versus withdrawing or changing majors).	15	88	NWCC utilizes the number of graduates employed in funeral service at graduation or 6 months post-graduation.	16	69
Ogeechee Technical College	Graduation rates are based on the use of student cohorts. An identifying course FSRV 1020 Funeral Service Law & Ethics is used to determine the cohort. Students are considered graduates once they have completed all the required coursework, regardless of their NBE status. The graduation rate is calculated on a calendar year (spring, summer, and fall). The calculation method for graduation rates is the number of graduates divided by the number of graduates and leavers. This method of calculation is consistent with the method of calculation used by the Technical College System of Georgia in determining a statewide graduation rate and for calculating individual graduation rates for each technical college in the system.	29	94.6	Job placement/employment rates are based on the use of the same cohort mentioned previously. An identifying course is used to determine the number of students who are in funeral service majors. The calculation method is the number of graduates placed in the field divided by the number of graduates. Graduates identified as 'Continuing Education' are excluded from the denominator. This method of calculation is consistent with the method of calculation used by the Technical College System of Georgia in determining a state-wide placement rate and for calculating job placement rates for each technical college in the system.	35	89
Piedmont Technical College	We evaluate the number of new enrollees and graduates who complete the program within 1.5 times during the calendar year.	31	97	The job placement rate is calculated based on the number of students who gained employment within six months after graduation.	32	88
Pittsburgh Institute of Mortuary Science	Calculation method is # of students who graduated divided by # of students in reported graduating cohort, which is published to College Navigator.	84	73	Surveys are conducted at program completion with data reported using virtual collection methods via the LMS (with occasional use of manual for campus). Calculation method is # of student indicating employment divided by # of students in reporting cohort minus students fulfilling military obligations and students seeking to continue their education to earn a bachelor degree with one of our consortium programs. It typical practice that students may not begin (or in the case of Ohio CANNOT begin) their internship until finishing such an education program. Data is shared with PA DOE-PLS and ABFSE	93	76
Salt Lake Community College	We calculate our graduation rate by dividing the number of students who graduated by the number of students still in the program at the end of the second semester. This is the data we report to ABFSE and to our institution.	82.4	82.4	We gather employment data from the graduates and report it to ABFSE and our institution.	14	93
San Antonio College	New enrollees are reported as a cohort when they enter the accredited program and are tracked to graduation. When students complete 50% or more of the degree program, they will be tracked to graduation for calculation of the timely graduation rate. From this point, completion in 150% of program length will be considered timely graduation (10.3.2).	22	91.7	The job placement and employment rates are measured within six months of each student's graduation. A survey done at graduation will be accepted as 'within six months.' Students for whom no data is available will be considered not employed. Funeral service-related employment, active military duty, or enrollment in further higher education, as per the Texas Higher Education Coordinating Board CB116, count as employment for this calculation (10.3.6)	33	82
Southern Illinois University	The program starts counting students for graduation rates when they start the fall semester of their junior year. This is the halfway point for the program. When they start embalming class (whether they are on a 2, 3, or 4 year track) they are counted for graduation purposes. If they leave or get dismissed from the program before the end of the last 2 academic years, they are considered to have not graduated and the number of graduates is divided by the total number of those that started the junior year. This information is submitted to ABFSE, SIU and posted on our website.	18	94.7	Job placement is determined by contacting all graduated the November after May graduation (approximately 6 months after graduation). We determine those that are employed and divide that by the total number of graduates. This information is submitted to ABFSE, SIU and posted on our website.	18	94
Southwest Tennessee Community College	The graduation rate is calculated by the number of cohort that graduate in a certain time period (2,3, or 4 years). The entities to which the data are submitted to be Southwest, SACS-COC and TBR.	4	80	Job placement rates are measures through a job placement survey. The formula for the job placement rate is the number of students currently employed in funeral service divided by the number of students that graduated.	4	100
St. Louis Community College	The graduation rate is calculated by dividing the number of graduates by the total number of new enrollees.	12	86	The job placement rate is calculated by dividing the number of employed by the total number of students.	12	58
St. Petersburg College	percentage of graduates who graduated in 1.5 years or less after reaching the midpoint of the curriculum for the AS degree.	21	68	Students complete a survey after graduation and before six months have passed.	31	93
State University of New York at Canton	Graduation rates are determined according to the federal government's definition, which involves tracking first-time, full-time, degree-seeking freshmen in each fall semester following the passage of 150% of the program's expected completion time. The numerator represents those students who successfully attain any degree within 150% of the program's anticipated duration, while the denominator includes all individuals from the original first-year cohort who are still alive. However, since the majority of students entering the FSAD program arrive at SUNY Canton with prior credits, they often do not meet this criteria. Therefore, the FSAD program calculates its graduation rate based on students who have accumulated more than 60 credits and complete the program within 150% of the expected timeframe from that point onward.	16	83	Employment placement rates are determined through surveys administered locally after graduation. These surveys are distributed to all FSAD graduates six months following program completion, encompassing inquiries regarding their current employment status and satisfaction with the program. The job placement rate is calculated by dividing the total number of survey respondents reporting employment by the overall number of survey participants. Additionally, the FSAD Program Director personally reaches out to each graduate to ascertain their post-graduation job placement status.	17	83
Tidewater Community College	Graduation rates for the AAS - Funeral Service are calculated using the following methodology. The TCC office of Institutional Effectiveness calculates graduation rates for selected programs. Two-year and three-year rates are based on a cohort of students admitted to the program during a particular semester. Students are identified by enrolling in entry level courses. All admitted students in a cohort including both full and part-time are included in this calculation.	10	69	Graduates are tracked for a period of one-year following graduation. If a student graduates with a job in FNS or obtains such a job prior to submission of the annual report, he/she is considered employed in funeral service. 82	12	91

University of Arkansas Hope-Texarkana	At the end of the calendar year, the number of graduates from a cohort is divided by the total number of students that started the program in that cohort. Graduation rates are submitted with the college data to state and federal Department of Education agencies.	11	50	Graduates are surveyed approximately 6 months after graduation. The number of students employed include graduates who are employed in funeral service, active military duty, or enrolled in further higher education. The number of students employed is divided by the number of graduates. Students for which no data is obtained are considered unemployed. This information is submitted to the Health Professions Dean and Vice Chancellor for Academics.	11	91
University of Central Oklahoma	Current graduation rate is calculated using total enrollment for previous year report, subtracting students who left in current year report (based on ABFSE standard of only counting students who have completed 50% or more of the program) and dividing to get percentage of students staying on path to graduate. This data may be evaluated departmentally and shared at the college level. It is also available here and for interested parties on the website or through request to our office. General data for the institution is also available publicly on the University IR Data Dashboard.	26	95	Employment rates are measured by surveys and post-graduation correspondence. Students employed in non-related field or not employed would be subtracted from graduate total for the year and the result is expressed as a percentage.	27	93
University of Minnesota - Twin Cities Campus	At the end of each calendar year, the total number of graduates (x) is divided by the number of graduates who completed their degree requirements within 1.5 times their program length (y), to determine the program's timely graduation rate (z), as follows $x/y=z$. For students who matriculate as juniors, 1.5 times program length is 36 months; for students who matriculate as sophomores, 1.5 times program length is 54 months. The Program does not matriculate freshmen.	17	100	The Program's employment percentage rate is calculated as follows: At the end of each calendar year, the total number of graduates (x) is divided by the number of graduates who secured employment in funeral service following graduation (y) to determine the Program's annual employment rate (z), as follows: $x/y=z$.	17	94
University of the District of Columbia Community College	Of the 8 students in our 2023 graduating cohort, 4 completed the program and graduated. $4/8 = 50\%$. This data is submitted to the registrar's office.	4	50	We keep in contact with our students and have employer surveys. $1/4 = 25\%$ are employed in Funeral Service.	4	25
Vincennes University	VU utilizes the IPEDS method for graduation calculation based on 150% of time to graduation. The VU FSE Program was set at 5 semesters for 2023 graduates. The students would need to complete the program in 7.5 semesters or less.	12	80	After students graduate, VU deploys the graduate survey. The survey asks if the students are working, and if yes, where and in funeral service or not. Once returned and the survey is closed, the information is evaluated and the graduates who are working in funeral service is compared against those who are not in funeral service.	12	75
Wayne State University	The number of graduates from a cohort is divided by the total number of students who started the program in that cohort. Students continuing in the program, either by part-time status or to repeat a course, are not included in the calculation. Data are provided to college administration through the Associate Dean for Health Sciences and the Mortuary Science Advisory Committee.	32	92	Job placement is determined just prior to graduation in July. Students who do not report job placement prior to graduation are contacted again in January. The number of graduates employed is divided by the total number of graduates. Data is submitted to college administration and the Advisory Committee as part of the assessment process.	36	97
Worsham College of Mortuary Science	Worsham College's campus program is 12 months, therefore, new campus enrollees for 2022 will become 2023 graduates. The online program is 16 months in length, so their graduation date will depend on the student's start date.	90	88	Graduate surveys are sent to the recent graduates (within two months of completing the program) seeking their input on their current and future job prospects. This survey allows the college to capture the student's supervisor's contact information for additional feedback on student progress and job comprehension. Students employed in funeral service are divided by the number of graduates that are: in funeral service, not seeking employment, not employed	90	92
